

American Power Design, Inc.

"The best high voltage design solution"

Jan 1, 2013

Reg. Quality Assurance;

All of American Power Design products are designed to meet UL60950 and manufactured to IPC Standard (IPC-A-610 Rev F).

Work Order histories, Engineering Bill of Materials, Purchasing histories and Test Specifications are all stored in a central database with controlled access.

In addition, 100% of our products undergo comprehensive computer controlled testing comprised of hundreds of readings and calculations as well as 24 hour electrical burn-in process.

American Power Design takes great pride in our ability to produce a quality power converter and our less than 0.01% return rate supports this.

Regards,

Dave Lutz
